

ALL-IN-ONE PASSPORT SOLUTION

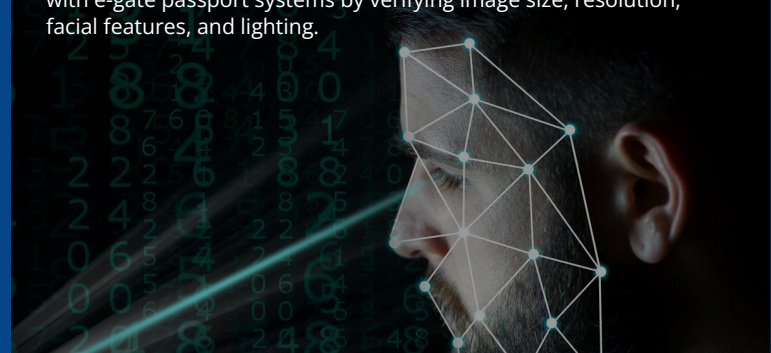

Reduce rejections with ICAO Compliance Certificate

ID Station offers the printing of biometric passport photos along with an ICAO compliance certificate, ensuring that everything meets the official standards. This reduces the risk of passport application rejections and gives customers a peace of mind, knowing they only need to go through the process once.

State-of-the-art Biometric technology

ID Station Gen 2 system checks each photo against over 80 ICAO-defined biometric benchmarks. This ensures compliance with e-gate passport systems by verifying image size, resolution, facial features, and lighting.

Future proof your business with online encrypted passport photos

IDstation.online provides a secure platform for storing digital passport photos. As a merchant, you can offer customers a complete service: have their passport photo taken, and provide them with a digital copy and a unique code. This code allows customers to access their photo on IDstation.online and use it for official online applications, such as passports, visas, driving licenses and more

Over 165 country templates

ID Station supports passport photo requirements for over 165 countries, ensuring your photos meet visa and passport specifications worldwide. It is also fully compatible with online passport and visa applications.

Wireless Transmission

Camfi Controller

The ID Station system features our Camfi controller, which wirelessly transfers photos from the camera to the tablet or PC after each shot. This streamlined process makes capturing ID photos quicker and more effortless.

Setup & Staff Training

We'll send representatives to set up the system in your store and provide comprehensive training to ensure your staff operates it confidently. Additionally, we offer ongoing customer support to resolve any issues and provide guidance as needed.

Disclaimer:
Compliance guarantee remains subject to using the ID Station in accordance with Department of Foreign Affairs & Trade and International Civil Aviation Organization guidelines. It is dependent on the operator's skill to use the system correctly, as outlined in the operation manual. Any adjustment of settings or use of equipment not provided with ID Station will void this compliance guarantee. Compulsory compliance is required for new passport applications effective August 2004. Prices exclude GST and are subject to change without notice. *Annual profit in above table derived from assumption of at least 3 photos sold per day for 6 days a week for 52 weeks. The amount for individual site will vary depending on shop size and location. **ICAO compliance certificate sold in above table derived from assumption of at least 1 photo sold per day for 6 days a week for 52 weeks. †Point of Sale is only included in Full Kit™. †Training and Installation included in Full Kit™ price and must be within 200km of Capital City CBD. ID Station has online ability through a cloud service system called IDStation.online, which enables you to capture and print images with a unique code for customers to use in online applications. The cost of each IDStation.online transaction will be aligned to current media prices. †Subject to Internet connectivity. All media supplied and paid for includes software licensing and general tech support and should be purchased through Brands Australia. Only coded media will function in ID Station Systems. Note: Product features and specifications are subject to change and vary depending on model selection, please consult your sales representative for confirmation. Terms & Conditions apply and are available on request. Brands Australia reserves the right to decline orders arising from inadvertent or other errors.
